Note 1: The statistics are estimated figures based on the return from the licensed Internet Service Providers ("ISPs"). From January 2019 onwards, the statistics are compiled in terms of the number of "access lines" provided by ISPs, while it was in terms of the number of "registered customer accounts" prior to that. Please see Table 2 for statistics prior to January 2019.

Note 2: Access lines which are not used by customers of the licensed ISPs are not included, such as access lines of the campus networks in the universities.

Note 3: Registered access lines refer to the dial-up or broadband connections of ISPs to individual end users (including those free-of-charge connections). Where multiple access lines are provided to the same end user, the number of access lines is counted for the number of the statistics. In case more than one service is offered under one access line, it is counted as one access line only.

Note 4: Broadband Internet access refers to services with downloading speed of 1 Mbps or above.

Note 5: It refers to the maximum downstream bandwidth offered by ISPs. The actual downstream speed may be affected by various factors.

Note 6: The figures were revised to reflect the adjustments filed by ISP(s).

**Table 2: Statistics on Customers
of Internet Service Subscriptions in Hong Kong (Note a)**

End of Month	Estimated no. of registered customer accounts with dial-up access (narrowband Internet access up to 1 Mbps) (excluding Internet pre-paid calling cards) (Note b)	Estimated no. of registered customer accounts with leased line access (Note b)	Estimated no. of registered broadband Internet access customer accounts (Notes b and c)						
			Residential		Residential Total	Business		Business Total (Note e)	Total

12/2004	1,003,604	2,259	-	-	1,370,056	-	-	114,430	1,484,486
12/2003	1,084,368	2,739	-	-	1,134,041	-	-	96,566	1,230,607
12/2002	1,371,705	3,439	-	-	915,517	-	-	73,598	989,115
12/2001	2,018,238	7,066	-	-	-	-	-	-	623,302
12/2000	2,283,047	11,527	-	-	-	-	-	-	392,118
12/1999	1,734,254	7,495	-	-	-	-	-	-	-

Note a: The statistics are estimated figures based on the return from the licensed Internet Service Providers ("ISPs"). They do not include users who are not customers of the licensed ISPs, such as users of the campus networks in the universities.

Note b: For the period prior to January 2019, the statistics represents the number of registered customer accounts which refer to the customer accounts of ISPs (including those free-of-charge customer accounts). For a registered customer account which has more than one user login ID, it is counted as one registered customer account only. Registered customer accounts do not include customer accounts which are provided with e-mail addresses only.

Note c: Broadband Internet access refers to services with downloading speed of 1 Mbps or above.

Note d: It refers to the maximum downstream bandwidth offered by ISPs. The actual downstream speed may be affected by various factors.

Note e: Prior to December 2014, the estimated no. of registered broadband Internet access customer accounts under "Business" category was separated into "Offices" and "Others" categories.

Note f: The figure was revised to reflect the adjustments filed by ISP(s).
